GS

PERFORMANCE INC.™

GS

In 1969 the first GS Falcon was introduced, a car that made it possible for those with a real passion for driving to enter the exclusive club of high performance V8 motoring. Now 40 years later, Ford Performance Vehicles brings the GS back. Powered by the legendary Boss V8, producing 302kW and 551Nm of torque, the FPV GS sedan has some serious performance credentials. Making sure the GS sedan stands out from the pretenders are the unique GS stripe package, GS spoiler, FPV dual exhaust system and 19" Graphite alloy wheels. And like the original, the new FPV GS sedan represents incredible 'bang for your buck' which means with only 250 GS sedans available, they are sure to go very, very quick.

- 302kw 5.4 litre, quad-cam V8 engine • 551Nm of torque • TR6060 6-speed manual transmission • FPV exterior badging
- FPV high-flow dual exhaust system • FPV suspension - springs & dampers • 19" x 8" Graphite alloy wheels • FPV starter button
- FPV instrument cluster • Ebony cloth trim sports seats • Premium audio • Dual Zone air-conditioning and climate control
- iPod integration • Bluetooth® integration • Unique build number badge 1-250 • Certificate of Authenticity 1-250.

Options

- ZF 6-speed high-torque automatic transmission • Brembo 4 piston brakes (front) with single piston caliper at rear • Nudo Shadow leather sports seats • FPV floor mats • Reverse Sensing System • Reverse Camera • Satellite Navigation system with Suna Traffic Channel
